

## MARITIME CIRCLE LINE

This new shuttle service within the harbour connects Hamburg's maritime cultural attractions, such as exhibitions, museums, examples of architecture and historical vessels.

A complete tour with the CIRCLE LINE means: pay once and get off as often as you like. You can commence the tour at any of the stops.

Please ask for our MCL partner discount at the ticket counters of the respective attractions by showing your MARITIME CIRCLE LINE ticket.

## Experience Hamburg's harbour and culture

## The harbour tour featuring attractive stops

www.maritime-circle-line.de

### ST PAULI LANDUNGSBRÜCKEN

The Maritime Circle Line leaves from St Pauli Landing Bridge No. 10, just behind the Old Elbe tunnel. The Landing Bridges were built for the large overseas passenger liners at the beginning of the last century. Today they form the heart of Hamburg's harbour: they are the ideal point for watching the Elbe while enjoying one of the classic bread rolls filled with Hamburg fish specialities. The world famous Reeperbahn red light district is just around the corner from here. MCL departure times in summer: 10am / 12pm / 2pm / 4pm / 6pm

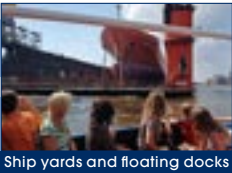

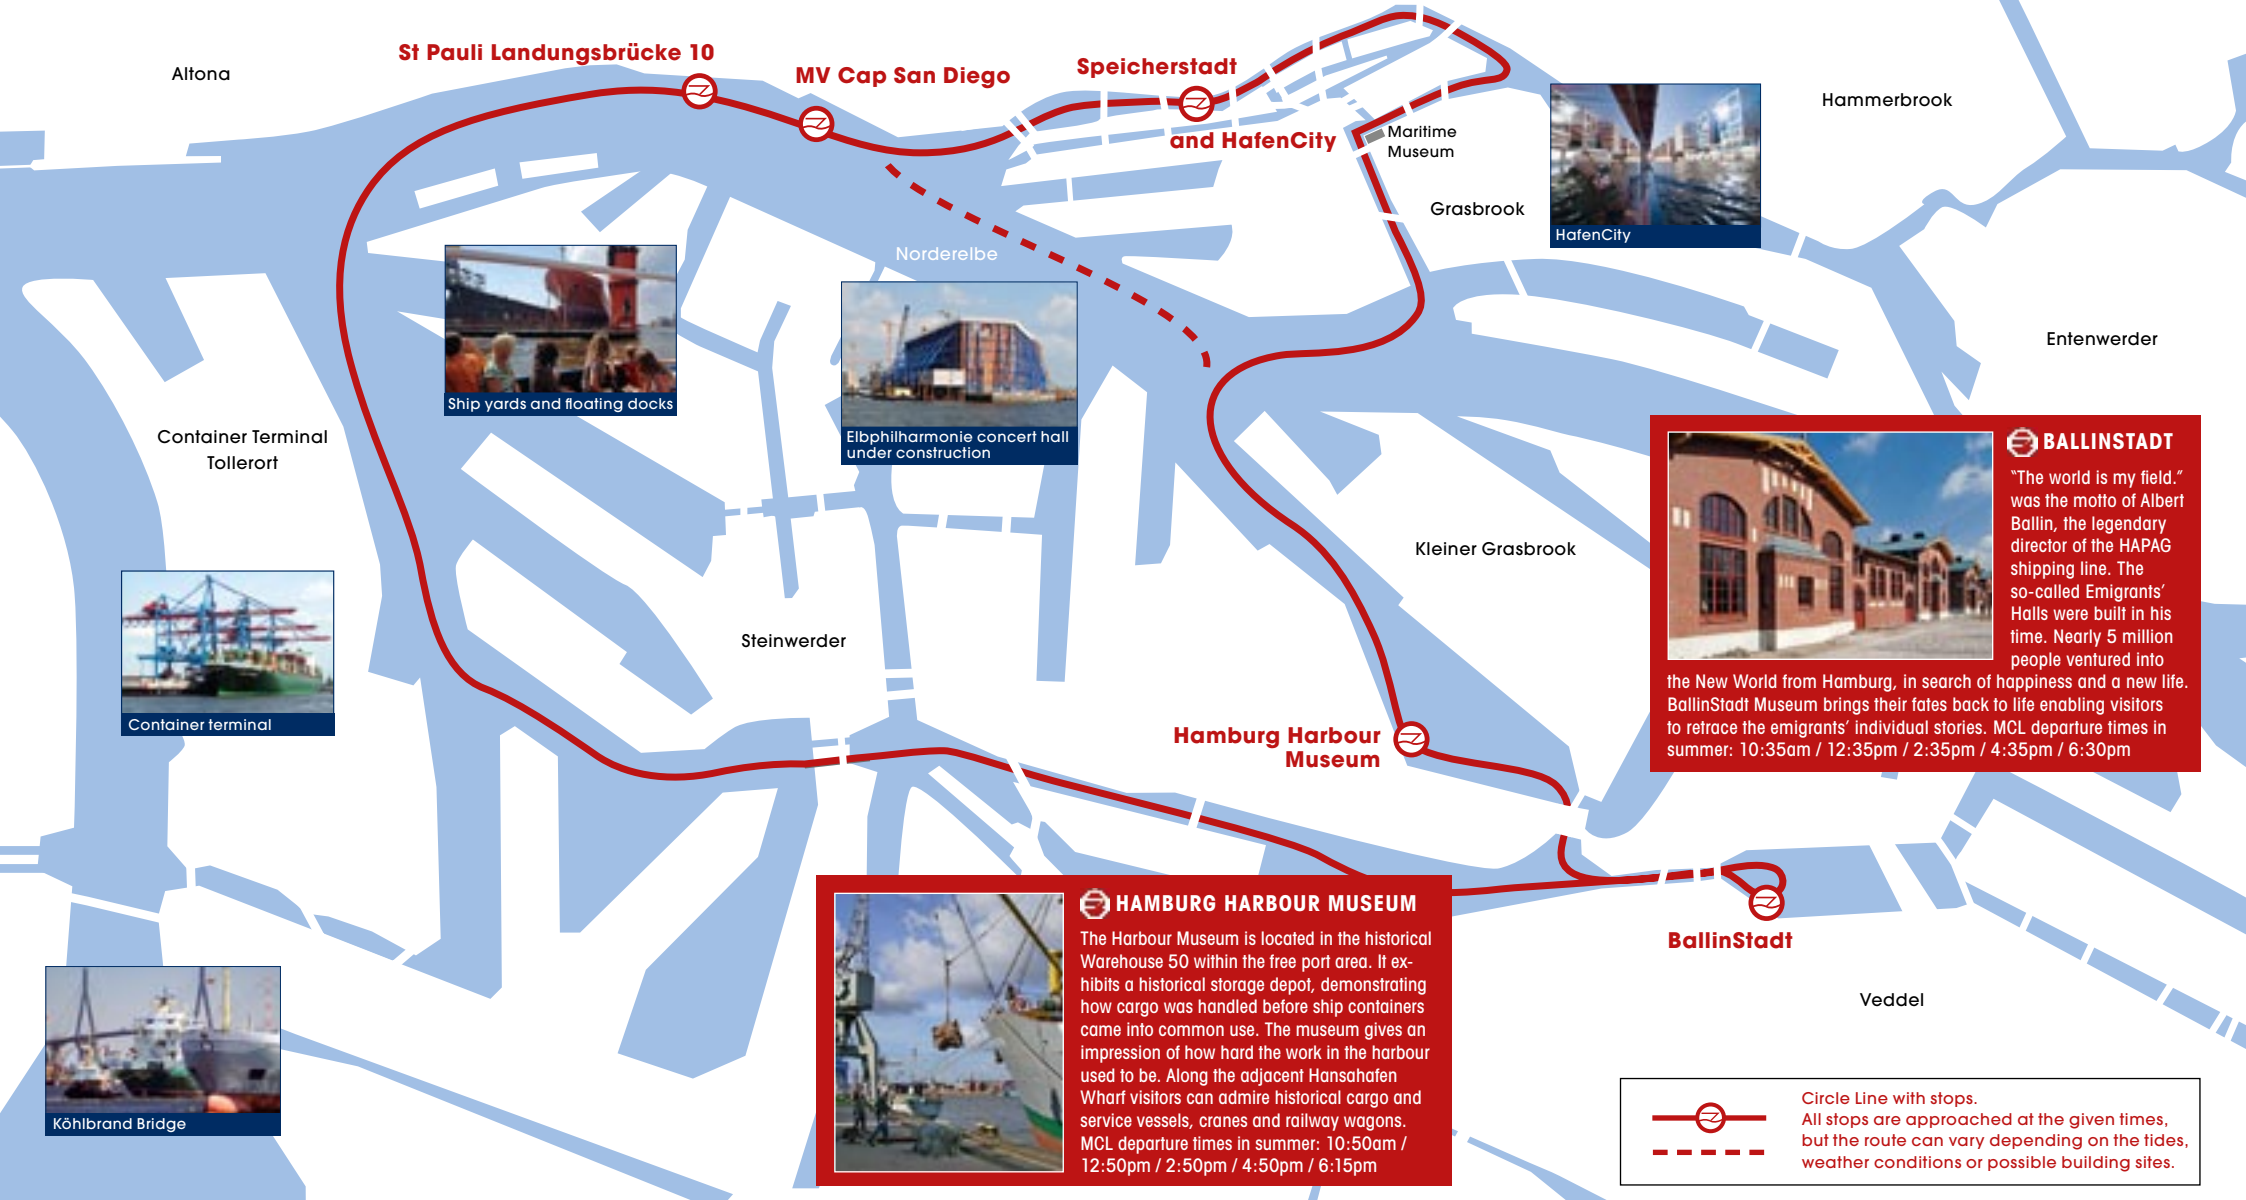

### MV CAP SAN DIEGO

The MV Cap San Diego, built in 1961, is the last seagoing museum cargo ship of this size. It has been lying at Hamburg's Überseebrücke (overseasbridge) since 1986. Apart from being a museum, it also has hotel rooms for spending the night in a maritime atmosphere, serves as venue for various events and hosts a bistro on board. From here it is just a short walk to Hamburg's landmark, the "Michel" (St. Michaelis church). MCL departure times in summer: 11:20am / 1:20pm / 3:20pm / 5:20pm

### SPEICHERSTADT AND HAFENCITY

The Speicherstadt is Hamburg's unique and historical storehouse city within the old harbour area. The Hafencity, Hamburg's vanguard new development district and one of Europe's largest building sites, lies directly next to it. These two areas host 9 museums and exhibitions, for example Speicherstadt Museum, Maritime Museum, Miniatur-Wunderland (the world's largest model railway) and the Hamburg Dungeons. MCL departure times in summer: 11:10am / 1:10pm / 3:10pm / 5:10pm

Ship yards and floating docks

Elbphilharmonie concert hall under construction

Container terminal

Köhlbrand Bridge

Hafencity

"The world is my field." was the motto of Albert Ballin, the legendary director of the HAPAG shipping line. The so-called Emigrants' Halls were built in his time. Nearly 5 million people ventured into the New World from Hamburg, in search of happiness and a new life. BallinStadt Museum brings their fates back to life enabling visitors to retrace the emigrants' individual stories. MCL departure times in summer: 10:35am / 12:35pm / 2:35pm / 4:35pm / 6:30pm

### BALLINSTADT

### HAMBURG HARBOUR MUSEUM

The Harbour Museum is located in the historical Warehouse 50 within the free port area. It exhibits a historical storage depot, demonstrating how cargo was handled before ship containers came into common use. The museum gives an impression of how hard the work in the harbour used to be. Along the adjacent Hansahafen Wharf visitors can admire historical cargo and service vessels, cranes and railway wagons. MCL departure times in summer: 10:50am / 12:50pm / 2:50pm / 4:50pm / 6:15pm

Circle Line with stops.  
 All stops are approached at the given times, but the route can vary depending on the tides, weather conditions or possible building sites.
